Models and Methods for a Self-Organising Distributed Computing Platform for Satellite Constellations

Atlas the Titan, Björn Annighöfer

C04

Background

Instructions: The poster is intended for the status update poster session during the Off-site Event in May 2026 and provide an update to the ATLAS Gallery. Please note that the use of the template's suggested content structure is entirely optional and that you may adapt your poster as you best see fit. However, please ensure that the poster's overall design scheme adheres to this template and that it covers the essential items as described below.

Objectives

Methods

Essential content:

- The poster should focus on the progress of your project research and show research highlights.
- The poster should provide a short introduction to your project's motivation, its objectives, and its methods for "casual" viewers.
- Essential links and collaborations to other projects should be outlined and illustrated. Project clusters and/or areas may consider e.g. presenting a common visualisation scheme.
- Please feel encouraged to include references to your relevant publications.

Collaborations

Notes on LaTeXtemplate:

- Please be sure to include the authoring researchers and date in the appropriate fields. The colour scheme, project leader names, project icon and institute logos are automatically adjusted based on the input project number.
- The size, relative placement and headers of the content blocks may be adjusted in the style template file *ATLAS_poster_template_2026.sty*.
